

Solvestone®

HERBAL STONE BREAKER

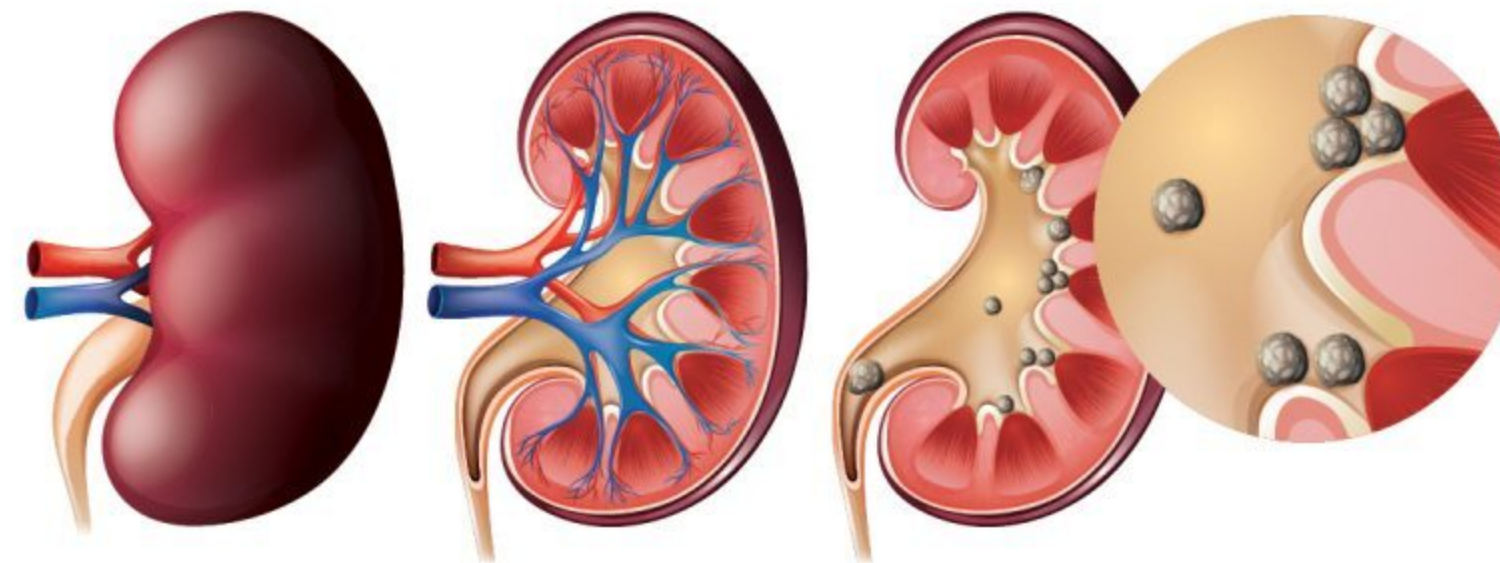

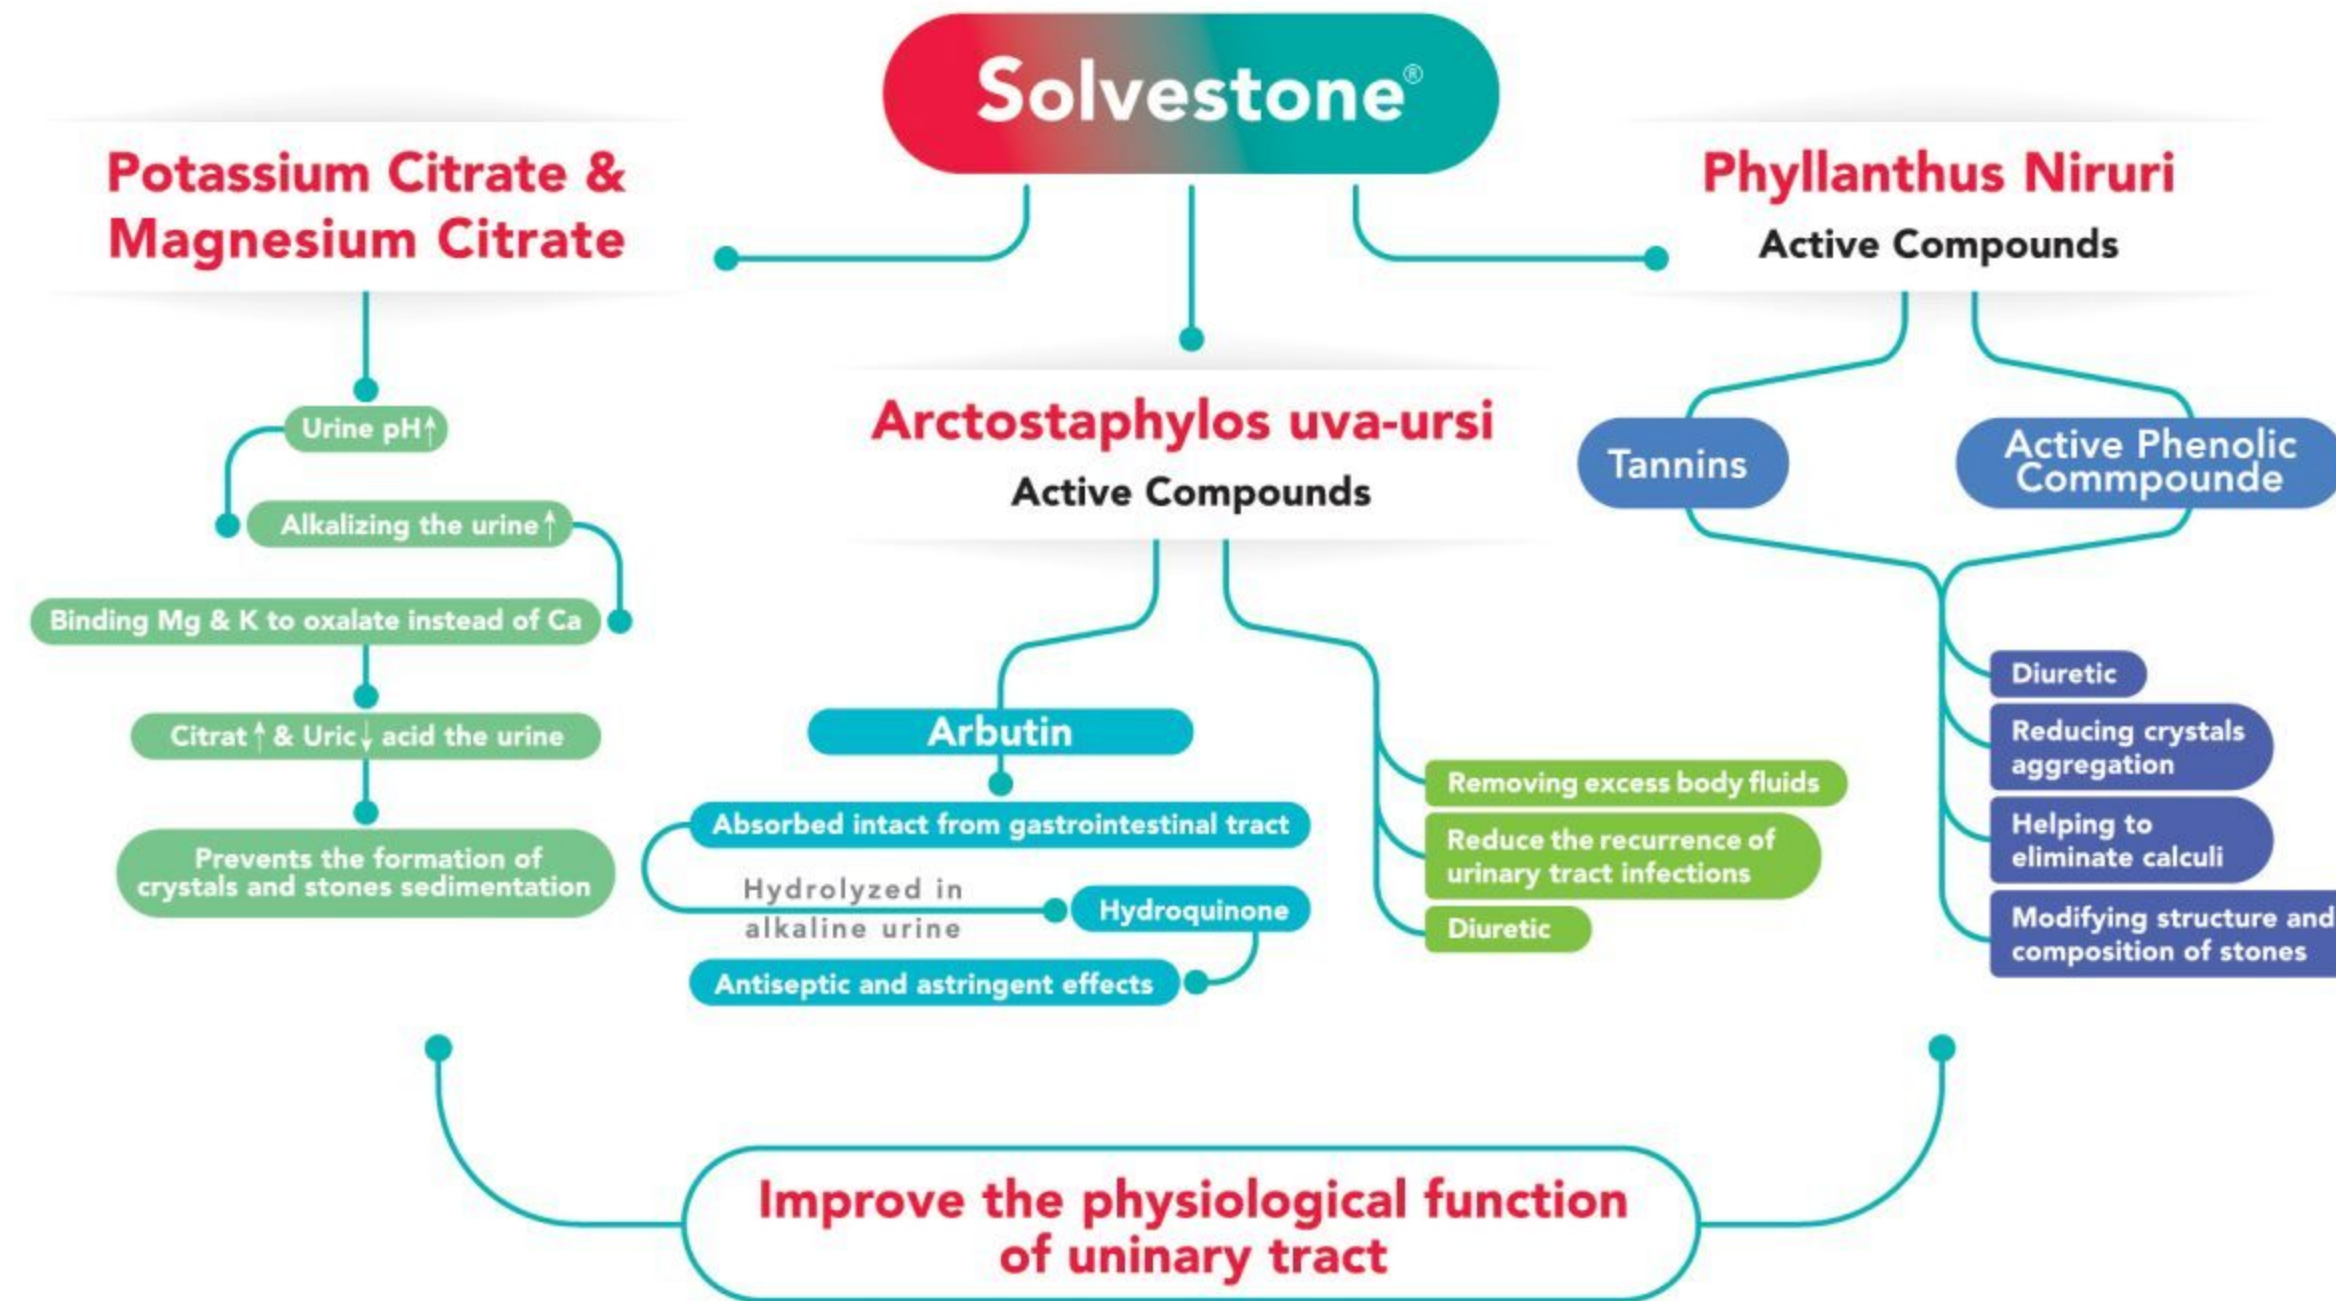

Pharmacological Action:

Phyllanthus niruri (stone breaker)

It is a rich source of tannins and active phenolic compounds, helps to improve the physiological function of urinary tract. This extract also has diuretic properties. Based on experiments and clinical studies, phyllanthus niruri extract has been shown to interfere with many stages of stone formation, reducing crystals aggregation, modifying their structure and composition. The clinical beneficial effects of phyllanthus niruri may be related to ureteral relaxation, helping to eliminate calculi or to clear fragments following lithotripsy or also to a putative reduction of the excretion of urinary crystallization promoters.

Arctostaphylos Uva-Ursi leaf extract:

it contains hydroquinone derivatives can help improve urinary tract function and also remove excess body fluids. Studies show that Uva-Ursi leaf extract can reduce the recurrence of urinary tract infections. Leaves of this medicinal herb have diuretic, antiseptic and astringent effects. Uva-Ursi contains arbutin, which is absorbed intact from gastrointestinal tract and hydrolyzed to hydroquinone in alkaline urine. Hydroquinone can have antiseptic and astringent properties.

Active Ingredients: Each Sachet contains:
Phyllanthus niruri (stone breaker) ext. 200 mg
(standardized on 45 mg total polyphenols per sachet)
Arctostaphylos uva-ursi ext. 200 mg
Potassium citrate 4561 mg
Magnesium citrate 2181 mg

Indications:

- Helps dissolve kidney stones and prevent the formation of calcium oxalate and uric acid crystals
- Improve urinary tract infections and contribute to better function.

Administration & Dosage:

Pour the contents of 1 sachet daily in 1500ml of water or any other non-carbonated beverage, shake well and stir until the sachet content is completely dissolved in the liquid and then drink during the day. It is recommended to drink 2 to 3 liters of water daily for better result.

Advantages:

- 1) Containing phyllanthus niruri extract and kidney stones dissolution effect.
- 2) Containing arctostaphylos UVA-Ursi extract and urinary tract disinfectants.
- 3) Containing Magnesium and Potassium citrate for kidney calcium stones dissolution.
- 4) Containing diuretic effects.
- 5) Preventing kidney stone formation such as calcium stones, struvite stones and uric acid stones.
- 6) Helps gallstone dissolution
- 7) Consumable for diabetics.
